

Learning Philosophy

DeeKay Excellence follows the SEED growth model for learning and mastering the coaching practice

This learning Philosophy allows the clients/coaches to first become aware of themselves, their style, strength and in-depth knowledge about themselves as the seed grows into the soil before getting out as a tree to explore on the options

As a coach training provider, we would

- Develop connection between the Client and the coach trainer, build the bonding between the two to learn, grow and transform each other in their learning process
- Set Clear expectations on training session requirements
- Provide actionable and Usable feedback on the coaching style
- Enable the clients as responsible coaches who can impact this world through their wisdom
